

Index

An index of the articles in volumes 13-16 from September 2005 to March 2009. In each of the four issues that constitute a volume a regular feature has been six *multiple choice questions and answers*. These questions, written by Robert Nutter, have appeared in each issue typically as the centre-spread on pages 20 and 21. Separating the questions on page 20 from the answers on the following page each issue contains a supplement. The September issue contains a supplement on *The UK Economy Today* written by Nigel Tree. The November issue contains another supplement, *The International Economy*, also written by Nigel Tree. The January issue contains a *Data Supplement* by Stephen Romer in volume 16 and in previous volumes by Nigel Tree. The fourth issue in March contains a *Revision Guide* written by Steve Tidball.
